

**APPLICATION for an SSS Numeral Adjustment Value**

Boat name ..... Sail number .....

The allocation of an adjustment value is free of charge when sent at the time of initial application or annual revalidation. At any other time the appropriate RORC fee for an amended certificate should be included.

**IMPORTANT: If adjustment for a Special Regulations category is included on your certificate, your boat must always comply with that category when racing IRC.**

**If your boat cannot comply with this, your organising Club will probably be able to manually apply the appropriate adjustment for a particular event, on your declaration that the boat will comply with the SR Category required for that event.**

See ISAF Offshore Special Regulations (SR ), available from ISAF, Ariadne House, Town Quay, Southampton, SO14 2AQ. [www.sailing.org](http://www.sailing.org). They are also printed in the annual RORC (racing) programme and on the RORC website [www.rorc.org](http://www.rorc.org).

Boat conforms in all respects with SR Category ..... (0, 1, 2, 3 or 4)

OR Specific adjustment features for boats not complying totally with SR requirements (tick those that apply. Maximum adjustment = 3)

- ..... i Self draining cockpit complying with SR 3.09
- ..... ii No cockpit lockers at all, or watertight or self draining cockpit lockers not extending below the cockpit sole.
- ..... iii Cockpit companionway closed to maindeck level and washboards
- ..... iv All hatches and windows complying with SR 3.08
- ..... v Full integral buoyancy capable of supporting the yacht and crew.

I, as the owner or representative of the above named boat, confirm that the identified features meet the requirements and that the boat and her equipment will remain at least to this standard when racing. If I make changes that are likely to reduce the applied SSS Numeral, I shall apply for a recalculation. I enclose the appropriate fee (if applicable).

Name ..... Signature ..... Date .....
